TUM BLOCKCHAIN CONFERENCE 26 + Hackathon

Submission & Judging Briefing

Saturday 31 October · Hackathon Stage

TUM BLOCKCHAIN CONFERENCE 26 + Hackathon

Four numbers to remember

15:00
Submission deadline on Devfolio

2.5
Minutes to pitch and demo, per track

2
Minutes of questions from the judge

3
Partner tracks per team, at most

TUM Blockchain Track: judged from your submission. No live demo needed.

TUM BLOCKCHAIN CONFERENCE 26 + Hackathon

Saturday: submit and judge

14:30
Final check
Repo public, README written, video uploaded, tracks picked.

15:00
Submissions close
Hard cutoff. Only published projects are judged.

15:10
Booth queues open
Line up at the booth of every partner track you entered.

~17:20
Last pitches
Queues close and the judges deliberate.

17:30
Winners & Closing
Announced on the Hackathon Stage.

Each partner judges its own track at its booth. The TUM Blockchain Track has no live demo: its judges review every published submission.

TUM BLOCKCHAIN CONFERENCE 26 + Hackathon

What every submission needs

The Devfolio project page

- → Project name and tagline
- → Project media: cover image or screenshots *
- → The problem it solves *
- → Challenges we ran into *
- → Technologies used *
- → Tracks applied: up to three partner tracks
- → Every teammate added as a builder

The links judges open

- → Demo video, 2.5 minutes at most
- → Public GitHub repository
- → README: what it does, how to set it up and run it
- → Live demo link, if you have one
- → Your track's extra proof (next slides)

* Required by Devfolio: the project won't publish without these fields.

BEFORE 15:00

“Save as draft” is not a submission.

Click **Publish project**. Only published projects are judged, and you can keep editing until the deadline.

TUM BLOCKCHAIN CONFERENCE 26 + Hackathon

Extra proof for each track

BSV ASSOCIATION

- → Links to example transactions on WhatsOnChain
- → Demo shows the AI agent's payment end to end

CARDANO

- → Transaction hash of a paid job or request on preprod
- → Demo shows one paid job from start to finish

API3

- → Deployed contract address and network
- → A way for judges to send their own responses
- → Tamper test in the video: one valid, four rejected

TUM Blockchain Track

- → Nothing extra to submit
- → No live demo: judged from your video, description and repo

Every requirement and a copyable checklist: **hackathon.tum-blockchain.com/prizes**

TUM BLOCKCHAIN CONFERENCE 26 + Hackathon

One five-minute slot per partner track

2:30
Pitch and live demo

2:00
Questions from the judge

0:30
Switch

Hard stop at 2:30

A timer runs at every booth. When it ends, the pitch ends.

Q&A is the judge's time

Expect to show code, a transaction on an explorer or a live run.

Next team ready

Wait beside the booth with your demo already open.

TUM Blockchain Track: no slot and no live demo. Its judges review your published submission.

TUM BLOCKCHAIN CONFERENCE 26 + Hackathon

How the booth queues work

01

Publish by 15:00

The partner tracks you picked on Devfolio are the booths you visit.

02

Line up at a booth

Queue in front of the booth of a partner track you entered.

03

Pitch to the next free judge

One judge from that company: 2.5 min pitch, then 2 min of questions.

04

Move to your next track

Repeat at every booth you entered until all your tracks are done.

TUM Blockchain Track: no queue and no live demo. Every published project is judged automatically.

TUM BLOCKCHAIN CONFERENCE 26 + Hackathon

Rules of the queue

Entered BSV? Queue there first.

BSV Association has one judge, so its line is the longest. Cardano and API3 have two judges each.

Split the team up

Teammates can pitch at different booths at the same time. Each needs a laptop with the demo ready.

Be ready at the front

Demo open, wallet connected, explorer tab ready. Setup time comes out of your 2.5 minutes.

Missed your turn?

Join the back of the line. Finish every track you entered by about 17:20.

TUM BLOCKCHAIN CONFERENCE 26 + Hackathon

Who judges which booth

BSV ASSOCIATION

1 JUDGE

Axel Maisonneuve

Adoption potential, the BSV stack, non-custodial design and a real agent payment.

CARDANO

2 JUDGES

Bora Oben

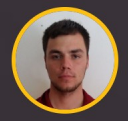

Vladislav Kudrin

A paid workflow end to end, Cardano tools, UX and real-world impact.

API3

2 JUDGES

Matej Falat

Ugur Schenk

Authenticated data at the core of the workflow. The tamper test is pass or fail.

TUM Blockchain Track

NO LIVE DEMO

BB **Benjamin Bosnjak**

ZN **Zafar Nasimov**

Judged from your submission: the projects that most deserve a security audit.

TUM BLOCKCHAIN CONFERENCE 26 + Hackathon

What to cover in 2.5 minutes

0:00–0:20	**The problem and who has it** One sentence on the user, one on what hurts today.
0:20–1:50	**Live demo of the core flow** Show it working, not slides about it. Keep the demo video as a backup.
1:50–2:20	**How it uses this partner’s technology** Point to the proof: the transaction on an explorer, the contract, the tamper test.
2:20–2:30	**What comes next** Where the project goes after the hackathon.

TUM BLOCKCHAIN CONFERENCE 26 + Hackathon

HACKATHON STAGE

17:30

Winners & Closing Ceremony

Questions before then? Ask an organiser or the hackathon Telegram group. Good luck!
