LH 574 | MUC → CPT | ARRIVAL | +3h 12m

Your flight lands 3 hours late. Now file a claim.

01

EU261: €250-600, if you claim

02

“Extraordinary circumstances”: strikes, weather, ATC

03

Weeks to months

さようなら

€19 → €250

If you land 3h+ late. Any cause. Paid in minutes. No claim.

On top of EU261, not instead of it.

LIVE DEMO

CARDANO PREPROD · x402

Every step was a real payment.

Research fee · x402	2 tADA	cba8f2bb…45bcb43	✓ Paid
Premium	3.8 tADA	a709afc4…0f03da3	✓ Paid
Payout	50 tADA	3a00133e…d6ceb92	✓ Paid

API3 AIRNODEHUB · AERODATABOX · BASE SEPOLIA

No valid signature, no payout.

THE REAL EVENT

LH 501 · GIG → FRA

landed

7h 08m

late

✓ PolicySettled: PaidOut

TAMPER TEST

✓ Accepted	Real response, on time
× Rejected	One value edited
× Rejected	Too old (over 2 h)
× Rejected	Another flight's response
× Rejected	Signed by another key

The tech worked.
Distribution didn't.

AXA fizzy · 2017–2019

Automatic payouts on Ethereum, about 11,000 policies, closed over low demand and weak distribution.

Etherisc FlightDelay

Automatic payouts, minimal adoption.

Traditional travel cover

Claims handling eats the premium; payouts take weeks.

Us: sold by an agent at the moment of booking · signed data instead of a claims department.

One fault. A whole country late.

~31%

of departures on time by 10:00 GMT

DATE	16 OCT 2026
CAUSE	ENAV data-network fault
CAPACITY	Italian airspace at 50% capacity
IMPACT	192 cancellations

Correlated events	→	Caps per airspace and day · aggregate limit per event · reinsurance
Buying after the news	→	The agent sees the strike or storm and stops selling
Trusted keeper	→	A Cardano validator that checks the signature itself

Sayonara, claims.

Oracle vs claims department

CLAIMS PROCESS

Tens of €

per claim

ONE SIGNED RESPONSE

€0.05

settles every policy on a flight (testnet)

against a €19 premium

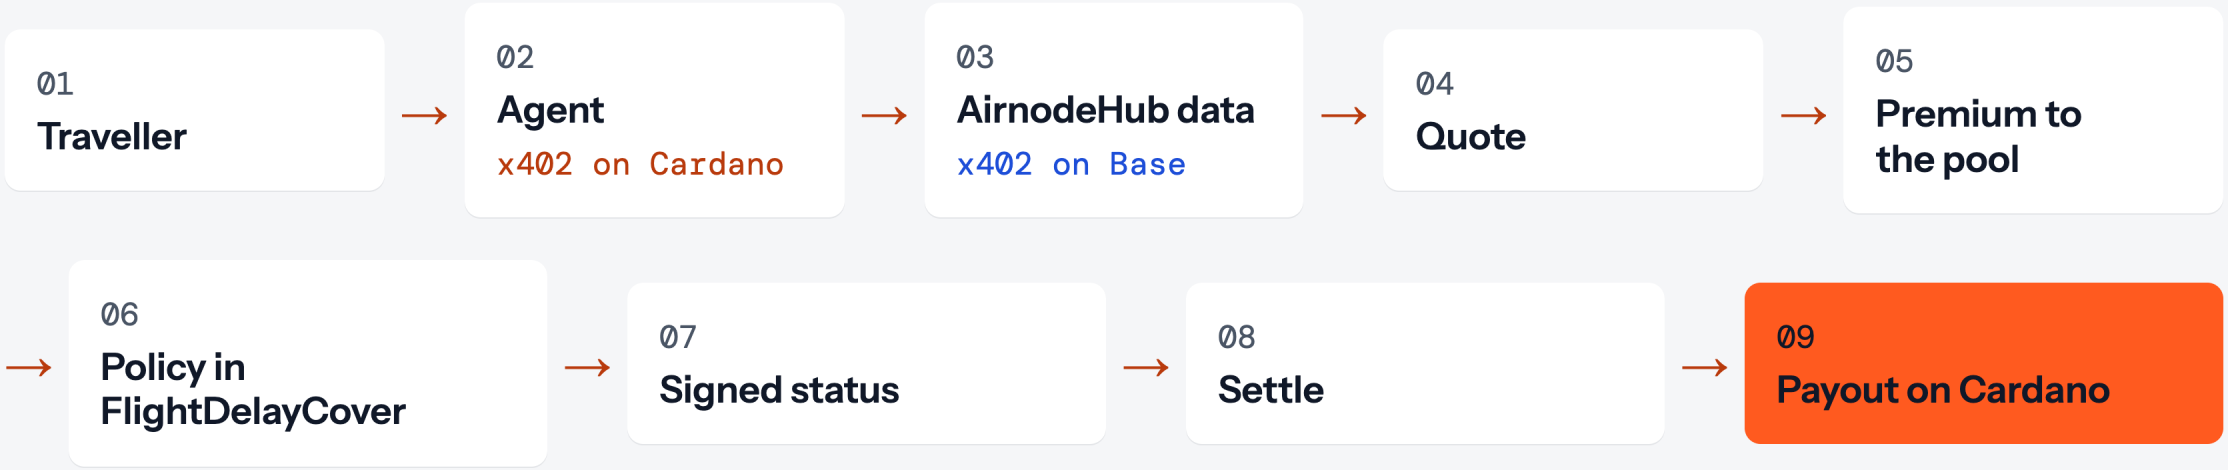

Pricing

P(arrival 3h+ late) × €250 + margin

6.2% × €250 = €15.50 < €19

Pricing isn’t our edge. We say so.

Architecture

Who carries the risk

US

The agent and the automation.

LICENSED INSURER

Holds the risk and the capital, pays us commission.

LATER

An on-chain LP pool can supply capacity.
